

# SPACEFRAME BUILDERS KIT

## Time to Build

Congratulations on your purchase of the Spaceframe Builders Kit. You can build forts, sculptures, tunnels, enclosures, doll houses, garages, castles and anything else your child can dream up. The possibilities are limited only by your imagination.

## Children 5 and up

Open the box for your child, remove the pieces and then step back. Let them take over, most children go right to work building. Feel free to have a seat and watch your little genius at work.

## Children 4 and under

We suggest building one structure with your child to get them started (and to have some fun yourself). Then let them take over, you will be surprised how intuitive the Spaceframe can be.

Each piece is slotted for various configurations. Remember there is no wrong way to build with the Spaceframe Builders Kit. Keep adding to your masterpiece until you are out of pieces. Make sure your child is helping!

The Spaceframe is made from 100% recycled plastic, soft to the touch while still strong enough to build a grand sculptural statement.

## Have Fun!

Here is a list of items that make great additions to the Spaceframe Builders kit.

**A Sheet** - Makes a great roof, offering protection from the elements.

**Stuffed animals** - It's always good to have some friends along.

**Signage** - Warn intruders (siblings) about the possible dangers of entering!

**Pillow and blankets** - Make a bed in your Spaceframe for an afternoon nap.

**Another Spaceframe Kit** - Build a city, develop your urban planning skills at a young age.
